

WHY DO I WANT TO MOVE UP/DOWN???

Think about moving up if:

- * You dominate every match with your serve and shot placement.
- * You are considerably more mobile on the court than anyone you are currently playing with.
- * You can keep the ball in play no matter where the ball is hit to you but the others at your level cannot.
- * You find yourself bored with the level of play you are experiencing
- * You desire more competition.
- * Rating Matches are scheduled and arranged by the Master Scheduler. Please refer to the Website for Rules of Rating games. Requests are be submitted from June 1 through August 1. Any request submitted during that period of time will be honored. If you are unsuccessful in winning your rating game, you may request a second and last attempt to move up. Bear in mind there may be others in front of you and you may have to wait. If you are successful in winning your rating game, even if it's your second attempt, you may request another rating game to the next level.

Think about moving down if:

- * Your mobility on the court has diminished over time and you are not able to run for a shot.
- * You find you are losing most sets regardless of who your partner is.
- * You find the people you are playing with are more competitive in ability
- * You struggle to get through a 90-minute session and feel you need more breaks during a match than the other players.
- * You have suffered an injury and you need some time to recover but still feel the need to exercise and be with friends.
- * REMEMBER: if you voluntarily move down, you can move back up without being re-rated.
- * So, in essence, next time you are playing, rate yourself. Ask if you truly feel that this is the level of tennis you should be playing. If we can be honest with ourselves, we can make tennis more enjoyable for all the members.
